

## FAQ

Q: Can Ai-BV01-32S connect to mobile phone Bluetooth?

A: Yes.

Q: Can Ai-BV01-32S play mobile phone music?

A: Yes.

Q: Does Ai-BV01-32S support online voice dialogue?

A: Yes.

Q: Does Ai-BV01-32S support direct control without using a wake word while the phone is playing music?

A: No. The wake word is required before using commands to control it.

Q: What is the default baud rate of the TX/RX and LOG ports in the factory firmware of Ai-BV01-32S?

A: 2000000bps.

Q: What is the function of the DACLP/5V pin on Ai-BV01-32S?

A: It is the power input pin for the power amplifier. A 5V voltage needs to be connected to power the amplifier.
