1. What wireless protocol does this module support?

Answer: 802.11 b/g/n/ax, BLE 5.3.

2. What is the main control chip of this series?

Answer: The main control chip is BL616CL from Bouffalo Lab (Nanjing).

3. What is the difference between the P series and the L series?

Answer: The main difference lies in the chip package. The P series adopts QFN48 package with 4MB PSRAM built-in by default, whereas the L series adopts QFN32 package without PSRAM.

4. Does the module support secondary development?

Answer: Yes. The SDK has been made available.

5. Do the P series and L series share one set of SDK?

Answer: Yes. They are essentially the same chip and only differ in package and configuration.

6. Does this series of modules support the 5G frequency band?

Answer: No, it does not.
