1. Product Overview

EC-01G-Kit is a development board designed for The EC-01G module, which is shared with the EC-01-Kit. The development board integrates CH340C serial port chip and SIM card holder to facilitate the use of developers.

EC-01G is a NB+GPS module developed by Ai-Thinker. The main chip scheme adopted in NB part is EC616S. The NB-IoT chip features ultra-integrated NB-IoT soCs, ultra-low power consumption and full support for the 3GPP Rel14 NB-IoT standard, making it an extremely cost-effective NB-IoT chip.

It has the following characteristics (NB-IoT) :

- Integrated RF transceiver, PA, RF filter, antenna switch and power management
- Excellent communication performance and stability in a variety of wireless environments
- Excellent power consumption performance in various modes (PSM, DRX, eDRX, connected state)
- Unique MCU mode, providing lower operating current and shorter wake up time

Figure 1 EC616S chip architecture diagram

The GPS part of EC-01G module adopts AT6558R as the main chip scheme. The chip is a high-performance BDS/GNSS multi-mode satellite navigation receiver SoC single chip, on-chip integrated RF front end, digital baseband processor, 32-bit RISC CPU, power management function. The chip supports a variety of satellite navigation systems, including China's Beidou Navigation Satellite System BDS, GPS of the United States, and GLONASS of Russia, and can realize joint positioning of multiple systems.

It has the following characteristics (GPS) :

- BDS/GPS/GLONASS multi-system combined positioning and single system independent positioning are supported

8. Product notes

EC-01G-kit V1.0 can only use one of the onboard micro-USB ports, TX1 and RX1 for communication and recording. When the serial port chip as shown in the picture exists, only onboard micro-USB port can be used for communication and recording. If you want to use TX1 and RX1 pin row for communication and burning, you need to remove the serial chip, at this time micro-USB port does not support communication and burning. Figure 10 shows the differences between EC-01G-Kit V1.0 and EC-01G-Kit V2.0
